What A-Levels for Degree Subjects?

Most **Science subjects** at university (Medicine, Veterinary Science, Biology, Chemistry, Chemical Engineering, Biochemistry) require Chemistry. These subjects also require another science, many preferring Biology.

For **Medicine and Veterinary Science**, it is best to take Chemistry, Biology and one from either Maths or Physics. This way you will keep the vast majority of medical schools open to you.

All **Language courses** at university require the language being studied and the top universities prefer a second language.

Most **Engineering** courses require Maths and Physics

Most **Economics courses** require Maths and certain universities like Further Maths (although they will rarely explicitly say so).

Most **English** courses require English Literature – English Language on its own is not sufficient.

Humanities courses such as History and Geography require that subject at A level.

Natural Sciences, Materials Science, Biomedical Sciences, Environmental Science, Optometry and Earth Sciences (Geology) require two from Biology, Chemistry, Maths or Physics.

Many **Sports Science** courses want to see one from Chemistry, Biology, Maths or Physics. Some may treat PE as a science.

Nursing and Midwifery require Biology or another science.

Leading **Psychology** courses request one from Chemistry, Biology, Maths or Physics.

Most **Physiotherapy** courses will consider you with just Biology. However many require a second science subject from Chemistry, Physics or Maths.

Some **Architecture** courses want an arts and science mix. Many also ask for an art and design portfolio to demonstrate artistic skills so an Art or Design and technology A level may be critical.

Physics courses require Physics and Maths.

Maths courses require Maths and preferably Further Maths.

Actuarial Science requires Maths

Accountancy generally does not stipulate although one or two universities prefer Maths.

Some **Management Studies** and **Computer Science** courses prefer Maths.

Most traditional **Music** courses require Music and grade VII / VIII

Art & Design courses require Art or Design Technology including AGCE/National.

Some **Drama** courses require English Literature and for a few courses English and/or Theatre Studies.

For **Classics** courses Latin or Ancient Greek are required

Some **Occupational Therapy** courses ask for Biology.

In terms of **Teaching**, most A levels count. You need at least one from Art, Biology, Chemistry, Computing, Design and Technology, Drama (Theatre Studies), English, French, Geography, German, History, ICT, Italian, Mathematics, Music, Physics, Physical Education, Religious Studies (Theology) or Spanish.

Business Studies, Law, Anthropology, Archaeology, History of Art, Religious Studies, Politics, Philosophy, Sociology, Media Studies and **Surveying** do not stipulate any mandatory A levels. Although some Law degrees and Media studies courses stipulate English.

Degree Subject	Essential Advanced Subject	Useful Advanced Subjects
Accountancy/Banking Finance/Insurance	Some but not all require Maths	Maths, Business studies and Economics
Actuarial Science/Studies	Maths	Further Maths, Economics, Business studies
Aeronautical Engineering	Maths and Physics	Further Maths, Design Technology
American Studies	Requirements vary but English and/ or History are often asked for	Politics
Anthropology	None	A small number of courses like a Science AS Level such as Biology, Sociology is also very relevant.
Archaeology	None	Geography, History or Science subjects can all be useful
Architecture	Some courses say they want an Arts/Science mix. Some may require Art.	Art, Maths, Design Technology and Physics. National Art and Design may also be useful. Do note that a portfolio of drawings and ideas may be asked for.

Degree Subject	Essential Advanced Subject	Useful Advanced Subjects
Art and Design	Art/Design Technology.	Design Technology, Art. Note that most entrants onto Art and Design degrees will have completed a one-year Art Foundation course after Year 13.
Biochemistry	Always Chemistry and some degrees ask for Biology in addition. Some state Chemistry plus one from Maths/Physics, Biology.	Biology, Maths, Further Maths, Physics.
Biology	Biology,	Chemistry, Maths or Physics, some will accept Psychology

University League Tables 2020

[How to use](#) | [Methodology](#) | [Full Table](#) | [Print](#)

Our League Tables rank UK universities both nationally and in 70 subjects. You can sort each table on the measure important to you and compare universities. Read university profiles for more information about the institutions or search for courses. We also rank 12 specialist colleges and conservatoires separately in the Arts, Drama & Music League Table.

Filter by Subjects Year Region Group Order by Overall Score

Rank	University Name	Entry Standards	Student Satisfaction	Research Quality	Graduate Prospects	Overall Score	Next Steps

A-Z of University Courses

TSR Wiki > [University](#) > [Choosing a Subject](#) > [A-Z of University Courses](#)

Below are our links to the main guides university courses. There are also links to the academic help forums and university course forums for each subject. For some subjects we have several other articles too - to see them all click on the 'see more' links.

More info on: [Choosing a Subject](#)

If there is a red link for a subject it means we don't yet have a uni course for that subject - please feel free to start one. Also, you can make additions to any of the other courses we already have guides for. If your course is not already on the list, you can add that in too! Try to keep more specialist degrees together, for example experimental physics should go under the general physics course while British Politics should go with the general politics page.
